DETAILED ACTION

Applicants' response, which included amendment to claims 29-31, filed 8/21/2003 under 37 CFR 1.116 in reply to the final rejection has been considered and entered.

Claims 29-31 are pending.

In view of applicants' response, particularly amendment to claims 29-31, 112 first paragraph rejection made in the previous office action has been obviated.

However, the Finality of the previous office action is withdrawn to apply the new double patenting rejection shown below.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 19-24 of U.S. Patent No. 6,265,401. Although the conflicting claims are not identical, they are not patentably distinct from each other because the same subject matter, method of treating

complications of diabetes embraced in the instant claims is also claimed in the said US Patent.
